SKILLS

- Java; SpringBoot; JavaScript; Node.JS; Express.JS; SQL; GraphQL; React.JS; SAP-UI5;
- Cloud CI/CD; Jenkins; Docker; AWS; Kibana; Dynatrace; ElasticSearch;
- Agile SDLC; Git; Jira; Generative/Conversational AI;

EXPERIENCE

Developer - [SAP Labs](#)

April, 2025 - Present

- Building scalable, secure, and reliable **Business AI for SAP Concur Joule**, using cutting-edge LLMs and document grounding to enhance travel and expense management for **60,000+ global users**.
- **Designing and developing an event-driven system with strong security, real-time monitoring, and ethical AI compliance**, aligning with SAP's North Star architecture and ensuring engineering and operational excellence.
- Own the full release lifecycle including test suite creation and testing strategy, consistently delivering high-quality features with 90%+ completion rate, 80%+ estimation accuracy, and active risk management.
- **Leading product security** as the SPOC by integrating CXone and Mend scans into new project pipelines, managing vulnerabilities, and overseeing compliance, while also delivering **translations for Joule in 49+ languages**.
- Configuring Dynatrace for observability and usage metrics to drive data-informed product decisions, improving tracking of key Joule scenarios and reducing production issues and through proactive monitoring.

Developer Associate - [SAP Labs](#)

Aug, 2022 – March, 2025

- Led the development and integration of tax filing solutions for Croatia, Argentina, and Singapore with the SAP Document & Reporting Compliance platform, streamlining compliance for global enterprises and reducing manual reporting efforts by **50%**.
- Simplified the **GSTR filing and financial analytics** to ensure compliance for Indian enterprises at scale using Java, SpringBoot, and SAP Analytics Cloud.

Associate Software Engineer - [HighRadius](#)

July, 2020 - July, 2022

- Optimized client onboarding, consultation, and infrastructure processes, improving efficiency by **40-50%** and reducing support ticket volume through automated admin modules.
- **Built a data-driven, AI-enabled FinTech B2B cloud application** with an integrated ML model, chatbot, and interactive analytics for Receivables management and prediction.
- **Led a team of 10 developers** as a mentor and Pod Lead in an agile setup with complete ownership of sprint planning and execution.

PROJECTS

Cloud Application for Product Roadmap Management

- Built a gamified cloud tool for roadmap management and feature prioritization to drive product success as part of M.Tech dissertation to drive product success.

M-E-T-A ([github repository](#)) – Winner of 10th Project Innovation Contest, KIIT

- Developed a project management and performance tracking app to enhance team efficiency and lifecycle visibility.

ACADEMICS

| Degree | Institute | Year | Marks / CGPA |
|-------------------------------|-----------------------------------|-----------|-----------------|
| M.Tech (Software Engineering) | BITS Pilani | 2023-2025 | 8.25 /10 |
| B.Tech (Computer Science) | KIIT University, Bhubaneswar | 2017-2021 | 9.04 /10 |
| XII (CBSE) | Kendriya Vidyalaya, Danapur Cantt | 2016 | 90.40 % |
| X (CBSE) | Kendriya Vidyalaya, Danapur Cantt | 2014 | 9.8 /10 |
